

# **Building Features: Innovation, Humanism and Cooperation in a Divided World**

**20-24 April 2026**

**UNI - Universum International College**

We are excited to extend a special invitation to you for the **Erasmus+ International Staff Week at UNI – Universum International College** in Prishtina, Kosovo.

This invitation is addressed to both administrative and academic staff within the framework of the Erasmus+ Programme, and we warmly welcome colleagues from partner institutions who are interested in strengthening cooperation with Kosovo and our institution. In a world increasingly marked by division and complexity, it is imperative for higher education institutions to promote innovation, humanism, and meaningful cooperation. This training week will focus on the theme “**Building Futures: Innovation, Humanism and Cooperation in a Divided World**”, exploring how universities can foster inclusive education, strengthen international partnerships, and contribute to sustainable and peaceful societies. Through interactive workshops and structured discussions, participants will engage with contemporary challenges, share best practices, and develop collaborative strategies for shaping the future of global education.

The detailed agenda of the week will be shared with you soon!

We look forward to welcoming you to Pristina and to further strengthening our Erasmus+ collaboration.
